Professional Summary

Front-End Developer specializing in React and modern JavaScript frameworks. Experienced in building responsive web applications, dashboards, and scalable user interfaces. Strong background in JavaScript, TypeScript, and modern front-end tooling including Vite and Tailwind CSS. Passionate about creating efficient, maintainable, and user-focused applications.

Skills

- React.js
- JavaScript (ES6+)
- TypeScript
- HTML5
- CSS3
- Tailwind CSS
- Redux
- Bootstrap
- Sass
- jQuery
- Git & GitHub
- Vite
- Responsive Web Design

Work Experience

Front-End Engineer — D1stclassheritage

Domyheritage / Onenixpay | 2026

- Developed and maintained responsive front-end interfaces for Domyheritage and Onenixpay platforms.
- Built reusable React components and responsive user interfaces using modern front-end technologies.
- Integrated front-end applications with backend APIs and authentication workflows.
- Implemented dashboards, property-related interfaces, investment features, payment flows, and other platform functionality.
- Worked with TypeScript, Tailwind CSS, Vite, React, and modern development tools.

- Collaborated on feature implementation, UI improvements, API integration, and application deployment.

Front-End Developer (React) – VEEPAY, Lagos

Oct 2025 – Nov 2025

- Built a user management dashboard using React, TypeScript, and Vite.
- Developed reusable UI components for scalability.
- Implemented responsive design for improved usability across devices.

Front-End Developer – Nike-Obi Tech (Remote)

Oct 2023 – Nov 2023

- Contributed to building a responsive e-commerce platform using React.
- Collaborated with a remote development team on UI components and system integration.
- Assisted in development of a browser-based web builder platform.

Front-End Developer – DAVCENT (Remote)

Oct 2021 – Nov 2025

- Developed multiple responsive websites and web applications.
- Built an e-book web application using React (Wayfinder Reads).
- Implemented hosting and deployment using GitHub and modern development tools.

Projects

D1stclassheritage — Domyheritage / Onenixpay

Front-end development work across property technology, investment, payment, dashboard, authentication, and responsive web application features.

Link: <https://domyheritage-domy-frontend.vercel.app>

Wayfinder Reads

React-based web application for reading and managing digital books.

Link: <https://wayfinder-reads.vercel.app>

Portfolio Website

Collection of web development projects showcasing React applications and UI work.

Link: <https://david12peters.github.io/projects.html>

NewMusic Application

React-based web application for streaming and exploring music. Built using React, React state management, and modern JavaScript. Features responsive design and interactive UI components.

Link: <https://newmusic-seven.vercel.app>

Technical Experience

- Strong foundational experience in **React.js/Next.js** for building scalable web applications.
- Familiar with **React Native** for mobile development, with basic hands-on experience.

Education

Software Engineering

FreeCodeCamp – Texas (Online)

Feb 2021 – Mar 2023

Studied modern web development including React, JavaScript, HTML, CSS, Tailwind CSS, Redux, Bootstrap, and Sass.

Electrical Engineering

OOU (Ijebu ode, Nigeria)

Aug 2021 – Aug 2026

Studied Electronics, Software Development, Embedded Systems and Project Engineering Management

Certifications

- Front-End Development Libraries
- JavaScript Algorithms and Data Structures
- Responsive Web Design
- Electrical and Electronics Engineering
